### Skills

#### Design

Responsive Design  
Figma To ReactJS

#### Programming Languages

HTML  
CSS  
Tailwind  
Bootstrap  
JavaScript  
React JS  
Express JS  
MongoDB

#### Library

Redux  
React Hook Form  
Zod Validator  
Framer Motion

#### Tools

Figma  
Photoshop  
Git & Github

### Languages

Bangla — Native  
English — Conversational

### Youtube

I share my front-end web knowledge through video.

### Summary

Hi, I'm Habibur Rahman, a junior Front-end Developer skilled in HTML, CSS, Tailwind, JavaScript, Redux & React.js. I enjoy building projects and am enthusiastic about exploring new technologies. Currently, I'm diving into Next.js. Can I do everything? Far from it. I'm keen to join a team where I can contribute, learn, and grow. I believe collaborating within a team will enhance my skills and advance my career.

### Project Experience

#### Bistro Boss — MERN Project

I crafted a restaurant food ordering app using Express, MongoDB, JWS, and ReactJS. Featuring admin and customer dashboards, Firebase handles authentication, and React Query optimizes data fetching.

#### Car Repair — MERN Project

This website is built using Express for the backend, MongoDB for the database, and ReactJS for the frontend. It allows users to filter services through the backend filtering system.

### Front-end (ReactJS) developer Intern

Jan 2024 — Present

I joined Odommo.xyz, a startup agency offering digital services, as a front-end developer intern. They entrusted me with converting their Figma design into a ReactJS website, giving me invaluable experience in website development and team collaboration. I learned about project management tools and the challenges startups face, contributing to a project that will soon launch publicly. [Demo Link](#).

### Education

2019

#### Middle School

Berlin Kindergarten and High School
